

News Desk ONE

Workflow Management served daily.

PRODUCT MODULES

Administration is where it all begins. Create new sites, change appearance and manage users and the database.

A **Group Calendar** with more than daily and monthly views. Post public and private events and see what jobs are due and what's late.

Full-scale **Contact Management** with reporting. Managers can move contacts in bulk from old employees to new.

Workflow Management. Jobs appear on the calendar and follow a predetermined workflow, notifying the right person at each step of the way.

Use the **Equipment** module to track manufacturer, model, serial number and more.

Run **Custom Reports** and reassign equipment.

We didn't forget the Business Office with **Expense Tracking** for jobs.

Document Sharing makes it easy to upload, maintain and share important documents with your staff.

- Spend less time managing workflow and more time creating content. Keep schedules and people on track with NDO's calendar. Managers can view a subordinate's calendar to make sure they stay on track too.
- Single source for your company's contacts, calendar events, jobs, equipment and document tracking.
- Enhanced data collection and reporting for photography and imaging jobs.
- Reduce your Sarbanes-Oxley exposure. NDO uses industrial-strength encryption to control access. Security administrators only take care of security, not your content. All user passwords meet SOA requirements.

How would you like a groupware solution tailored to the publishing industry? How about one created by publishing professionals like yourself? Well, you're in luck. News Desk ONE is here. It's easy-to-install and easy-to-use. It's easy on the budget as well.

News Desk ONE streamlines a publication's workflow, allowing editors and managers to quickly review and approve assignments, while employees and external customers can view and update task progress.

Employees no longer have to come in the office to check for new assignments - around the office or around the globe, News Desk ONE is built to reduce cycle times!

System Requirements

You must have a Microsoft Windows-based web server either connected to your local Intranet or the Internet on a 24 hour basis. You also need:

- Microsoft Internet Information Server (IIS)
- Active Server Pages (ASP)
- Microsoft SQL Server or Access Database
- Desktop Web Browsers, IE6 or newer or FireFox 2 or newer
- Microsoft Mobile 5/6 Pocket Internet Explorer or Palm Netfront mobile web browsers

We're always happy to hear from you. Please contact us at sales@prosirius.com or Monday to Friday, 9am to 5pm Eastern at 800-516-2505.
