

Vehicle Crash Formulas

The Crash Reconstruction Calculator

PRODUCT FEATURES

VCF uses the Institute of Police Technology and Management (IPTM) "Equations for the Traffic Reconstructionist #47" guide.

Each copy of VCF comes with over 100 formulas that serve as the basis for creating and evaluating accident reports. Formulas are placed in Speed, Velocity, Time, Distance, Acceleration / Deceleration, Basic, Momentum and Miscellaneous groups for easier access.

VCF makes it simple to export calculations and results to other applications and word processors.

The Windows desktop version comes with National Highway Traffic Safety Administration (NHTSA) vehicle database containing data for vehicles sold in the USA 1975 to present.

Windows Mobile and Palm versions have complimentary Canadian Vehicle Specifications providing the same NHTSA info.

All mobile versions come with ability to perform Imperial and Metric calculations.

Finally! A true crash reconstruction investigation tool that you can take to the crash scene wherever the scene happens to be. Vehicle Crash Formulas (VCF) is the most portable, easy-to-use and inexpensive system available for traffic accident investigation.

But don't just take our word for it; Deputy Parker, Collier County Florida wrote "...VCF Palm has been instrumental in allowing me the ability to begin a thorough on-scene investigation".

Begin your own investigation at:
www.prosirius.com/ps

- Designed, developed and tested by real traffic homicide investigators.
- Accurate and Fast. Used by an expert witness on Court TV and on the market since 1984 so you know it works.
- Extremely easy to use. Virtually all investigators shown the mobile versions were navigating screens and doing calculations without any instructions or documentation.
- Available in four versions: Windows Desktop PC, Windows Mobile (PDA), Windows Smartphone and Palm OS handheld.
- VCF is inexpensive. Why spend hundreds or thousands of dollars when you can get VCF for \$49 to \$129?

System Requirements

Windows Desktop

- Windows 98 / ME / 2000 / XP / Vista
- 512 megabytes of RAM memory and 20 megabytes of free disk space.
